

Weill Cornell Medicine-Qatar

Institute for Population Health

Population Health & Well-being Series

Measuring blood pressure: Clinic,
home and ambulatory measures

Live Webinar

September 26, 2023

4:00 to 5:00 PM (Qatar Time)

Speaker

Dr. Linda Gerber

*Professor of Population Health Sciences
Population Health Sciences
Weill Cornell Medicine
New York, USA*

Linda Gerber, Ph.D., epidemiologist and human biologist, is Professor of Population Health Sciences in the Division of Biostatistics in the Department of Population Health Sciences and Professor of Epidemiology in Medicine in the Department of Medicine at Weill Cornell Medical School.

Dr. Gerber has conducted extensive research related to hypertension including the relationship between psychological characteristics and responses to antihypertensive drug therapy, as well as the role behavioral factors on diurnal blood pressure patterns.

Dr. Gerber was the Principal Investigator on the Neighborhood Study, a National Heart Lung and Blood Institute (NHLBI)-funded study which investigated the relationship of ethnicity, socioeconomic status and sleep patterns on diurnal blood pressure rhythms.

She also collaborated with the Visiting Nurse Service of New York City on a number of federally-sponsored studies investigating the role of patient self-management on blood pressure control. Other areas of research include traumatic brain injury, estimating 24-hour sodium excretion from spot urine samples, and women's midlife health.

She is on the editorial board of the American Journal of Human Biology and is the Course Director of "Study Design", in the MS in Biostatistics and Data Science Program at Weill Cornell Medicine's Graduate School of Medical Sciences.
