Live Activities

Sample Size Determination for Clinical Research

Speaker

Ziyad R Mahfoud, PhD

Facilitators

Deema Al-Sheikhly, MEHP
Soha Dargham, MPH

January 10, 2020

12:30-5:30 pm

WCM-Q

Seminar Room: A055

Learning objectives

At the end of this activity, participants will:

- 1 Demonstrate an understanding of concepts related to sample size computation such as design effect, power, significance level
- 2 Determine the number of participants needed for different study designs commonly used in research such as prevalence studies, parallel arm clinical trials and pre-post studies
- 3 Use a combination of available software and online calculators to compute the sample size

Target Audience

Physicians, Nurses, Pharmacists, Dentists, Allied Health Professionals, Researchers, Students
