Population Health & Well-being series

Considering the Totality of Evidence: Integrating Real-World Data with Clinical Trial Data to Improve Decision-Making

Live Webinar

September 16, 2021
4.00 PM to 5.00 PM

Speakers

Dr. Ronac Mamtani
*Assistant Professor,
Hematology and Oncology,
Perelman School of Medicine,
University of Pennsylvania*

Dr. Mamtani is a medical oncologist and cancer epidemiologist at the Abramson Cancer Center at the University of Pennsylvania. His clinical practice focuses on urologic cancer and he leads the bladder cancer research program. His research sits at the interface between population-science and patient-oriented research, focusing on "real-world data" to improve the safety and effectiveness of cancer care.

Dr. Mamtani serves on the American Society of Clinical Oncology Scientific Program Committee for Health Services Research and Quality of Care, and the Bladder Cancer Advocacy Network Scientific Advisory Board.

Dr. Rebecca Hubbard
*Professor of Biostatistics,
Department of Biostatistics,
Epidemiology, and Informatics,
University of Pennsylvania*

Dr. Rebecca Hubbard is a Professor of Biostatistics, a Senior Fellow in the Institute for Biomedical Informatics, and a Member of the Abramson Cancer Center at the University of Pennsylvania. She holds a PhD in Biostatistics from the University of Washington and masters' degrees in Epidemiology and Applied Statistics from the University of Edinburgh and Oxford University, respectively. Her research focuses on the development and application of methods to improve analyses using real world data sources including electronic health records and medical claims data. Her methods have been applied across a broad range of research areas including health services research, cancer epidemiology, aging and dementia, and pharmacoepidemiology.
